Other Combo's

Someone has oily skin or is concerned about the product lasting all day/night....

Beige Eye fix base is a cream base meant to go under eyeshadow to prevent creasing. A little goes a long way with this product...so using too much of a creamy product will create more of a crease. This product can also go under lipstick or lipgloss for a longer wear.

***Blushes best for a fair skin tone:**

Contour, Apricot, and white light for a highlight

***Blushes best for mid tone skin coloring:**

Contour, Touch of Pink, Golden Lady, White light for a highlight

***Blushes best for a deeper skin tone:**

Contour, Classic Plum, Golden Lady For a highlight

***What to say if someone feels like they have older skin, wrinkles, droopy eyelids...**

Stay away from frosted textures in both eye shadows and blushes. If they like the shimmery/sparkly look, they should use it sparingly on their lower eyelids and avoid it all over their crease and brow bone.
